239	Description 22200 3822 3822 3822 3822 3822 3822 382	
170 3BR138	Description 38th 103 metrines it moves right and sometimes it moves left until it gets exhausted. Given an integer array A of size N which consists of integer 1 and -1 only representing ant's moves.	1368
	consists of integer 1 and -1 only representing ant's moves.	
38R23CD	Where 1 means ant moved unit distance towards the right side and -1 means it moved unit distance towards the left . Your task is to find and return the integer value representing how many times the ant reaches back to original starting position.	00
2	representing how many times the ant reaches back to original starting position. Note:)
58R23CD07	 Assume 1-based indexing Assume that the railing extends infinitely on the either sides 	070
50	Assume that the railing extends infinitely on the either sides Input Format:	
223CD070		
2230	input 1: An integer value N representing the number of moves made by the ant. input 2: An integer array A consisting of the ant's moves towards either side Sample laput	0
